

It's simple . . . really.

Cost containment is more than discounts.

Accessibility. Quality. Usability. Affordability.

These are the elements that comprise a cost-effective, high-quality health care program for clients with U.S. health care risk. At UnitedHealth International, our hallmark is the ability to integrate these elements into a program that maximizes your savings while ensuring a quality outcome for your insureds.

- **Accessibility:** The largest network in the U.S. – 560,000 physicians and over 5,000 hospitals.
- **Quality:** Care coordination programs that monitor care from before admission to follow-up care. Using the best of predictive models and evidence-based medicine.
- **Usability:** State-of-the-art claims and customer care systems and personnel that simplify the administrative processes for you and your insureds.
- **Affordability:** From unit cost discounts, to avoiding unnecessary treatment; from claim audits to arbitration of non-network claims, our approach generates the best return on your health care dollar.

All brought to you by UnitedHealthcare®. Serving 70 million individuals every day in the U.S.

When America's leading health care company goes global, a world of solutions follows.

For more information about how UnitedHealth International can reduce the net cost of your claims spend, please contact our Sales and Account Management Team at **+1 305-594-9291** ext. **5555**. Visit us on the Web at **www.unitedhealthinternational.com**.
